

Start Your Career with Us!

Fresh Graduate Program Software testing Engineer

✈️ Step into the world of Artificial Intelligence and work on real projects in an international, innovative environment.

💡 No boring theory – just hands-on experience that matters!

🎓 What starts your journey?

Bachelor & Master degree
Experience with bug tracking tools
(e.g., Azure DevOps, Jira)
Confident in English
Love global vibes and fast-paced teams
Bonus: Familiarity with eDiscovery platforms

🔍 What will keep you busy:

Manual testing of compliance workflows
Validate features and report bugs
Document results and support test cycles
Share feedback on coverage and risks

💻 Benefits:

Part-time/Full time (3-6 months contract with the possibility of extension)
Hybrid working model
Private health care
Access to Udemy business profile
Real projects + real mentorship = real growth

Our **Fresh Graduate Program** offers young graduates the opportunity to start their careers in an international environment, working in the AI sector. Through **training, mentorship**, and project work, participants gain practical skills and knowledge needed to take on key roles within the organization.
